RELEASE 11 COUNTIES

Mercer Expects to Raise the Quarantine by July 1.

There are 11 counties in the southwestern part of the state under quarantine because of scabbies and mange. They are the last of a long list and J. H. Mercer, state livestock sanitary commissioner, stated yesterday that the quarantine would be raised by the first of July. Mr. Mercer had just returned from Washington, D. C., where he took the matter up with the federal department. Mercer laid his plan before the chief of the bureau of animal husbandry and it met with favor.

"These counties are about as free from scabbies and mange as many other sections of the state," said Mr. Mercer, "and there is really no good reason why they should remain under quarantine. I can handle the few infected herds there the same as I handle them in other sections. My idea is to simply quarantine the infected herd instead of the whole county in which the herd is located. The federal department has agreed to scatter six inspectors over the state to assist the state inspectors in keeping out disease and locating it when it gets in. Of course, when the quarantine is raised it will be necessary to make rigid rules regarding the bringing in of cattle from Colorado and Oklahoma. Those two states have not made as determined a fight to eradicate disease from the cattle as this state has and their cattle are not in as good shape."

The counties now under quarantine are Finney, Kearney, Hamilton, Stanton, Grant, Haskell, Morton, Stevens, Seward, Meade, and Clark. The quarantine has been removed from all of the northwestern counties. Up to last December many counties in that section were under quarantine.—Topeka Capital.
